

Cloud Computing Exercises

 coursera.org/learn/unix/supplement/4qsOK/cloud-computing-exercises

1. Write a bash script that takes a file path as an argument and copies that file to a designated folder on your server.
2. Find a file online that changes periodically, then write a program to download that file every time it changes.
3. Try creating your own Twitter or GitHub bot with the [Twitter API](#) or the [GitHub API](#).
