

Important Git Features Exercises

 coursera.org/learn/unix/supplement/W3H85/important-git-features-exercises

1. Look at the help pages for git log and git diff.
2. Add to the .gitignore you already started to include a specific file name, then add that file to your repository.
3. Create a file that contains the Git log for this repository. Use grep to see which day of the week most of the commits occurred on.
